

MANUAL RESET

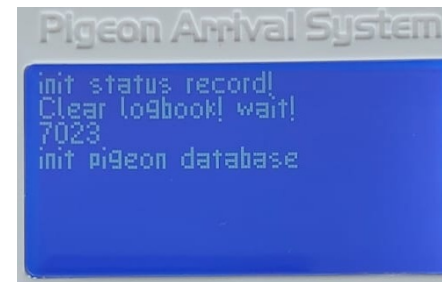

1. Disconnect the white plug from the PASbox.

6. The screen will now show the following text, with a counter running at the bottom.

2. Hold down the 'arrow left' button while reconnecting the white plug.
3. You will hear a beep from start-up, followed shortly by a second beep. After the second beep, release the "left arrow" button and immediately press the "right arrow" button 5 times. With each press, you should hear a beep each time.

7. The reset is now complete.

4. You will now get a prompt on screen.
5. Press the "OK" button.

8. The PASbox will now reboot and be ready for use.
