

PASCLUB Update the system

1.

Log in to PASlive as club manager and go to the PASclub tab.

2.

You will see a light orange button containing the update. In addition, you will also see the online button which is currently red. This means that the PASclub is not powered on and that the update is therefore not able to be installed yet.

3.

Connect the PASclub to the power supply and enter the activation code which can be found in PASlive.

4.

Click on the activation code button in PASlive of the PASclub you want to update. You will now see a 6-digit code that remains valid for 6 hours. This code you need to enter on the PASclub.

5.

After entering the activation code, leave PASclub in the main menu. The online button in PASlive will now turn green, additionally the light orange button in PASlive will turn bright orange.

6.

Now click the orange button to install the update. PASlive will display a message confirming your action. Click OK to execute the update.

7.

The update will take about 10 minutes.

8.

The PASclub will load the update, which you can see on the screen. When the update is ready, the PASclub will restart automatically.

9.

After the automatic restart, the PASclub starts installing the update. The LED lamp will continue flashing while installing the update. After the update is installed, the PASclub will again restart automatically. Subsequently, the update is finished and the PASclub is ready for use.
